Description

Pedestrian safety should be first and foremost on and around civil projects, work sites, events and festivals. Jaybro's crowd control barriers are quickly and easily erected to form a continuous barrier between pedestrian traffic and possible danger, to provide safety and organisation at public events and festivals to protect employees, patrons and the general public.

Barriers measure 2300mm x 1100mm and are constructed from galvanised steel. Featuring double interlocking hinge points, this crowd control barrier provides excellent stability. The interlocking hinge system makes installation quick and easy, and panels are designed with removable feet that can be taken off during stacking and storing.

Low intrusion feet also reduce the chance of pedestrian trips & falls, and they come with pre-drilled holes for bolt-down applications. Jaybro's crowd control barrier is fully welded, hard wearing, lightweight and easy to install. Bulk buy savings are available, please give our friendly team a call for more details.

- Fully galvanised for extended life outdoors
- Interlocking lightweight tubular steel
- Low profile - removable feet minimise trip hazard and allow easy storage
- Designed for rapid deployment
- Extremely stable

- Size: 2.3m long x 1.1m high
- Barrier including feet weighs 11kg
