

Printed Banner Mesh - 1.8m Open Weave Banner / Scrim with Free Cable Ties

Product Images

Short Description

Introducing our high-quality open weave printed fence fabric, measuring 1.8m x 50m, designed to withstand high wind exposure. This durable banner mesh offers 50% block out and has a site life of up to 2 years.

The banner mesh is carefully constructed with a thinly woven Nylon core coated with a liquid state polyvinyl chloride (PVC). The PVC dries to create a strong mesh finish. Although PVC is flammable, it is more fire-resistant than most general-purpose plastics due to its chlorine content, exceeding 50%.

For enhanced safety, we incorporate fire retardant inhibitors into the PVC composition, reducing the chances of flammability. The inner core of Nylon makes up only a small volume of the overall mesh and remains protected unless the PVC outer layer is burned.

Jaybro's Banner Mesh is designed with safety in mind, ensuring a reliable and durable solution for various applications. Please note that the fire retardant used in our PVC has no specified fire rating.

Description

Introducing our versatile open weave fence fabric (scrim), the perfect solution for high wind or coastal exposed sites. This printed shade cloth provides the same premium quality as our top-notch fence fabric but offers 50% block-out, allowing wind to pass through without creating a sail effect.

Designed for durability, it boasts a long shelf life and can be easily rolled, transported between sites, and unrolled when needed. With the correct installation, it can last up to 2 years on-site.

Key features:

- Available in standard 1.6m x 50m rolls
- Customized sizes and lengths available
- Easy to handle
- Constructed with UV treated polyester mesh
- Fully compliant with OH&S requirements
- Provides 50% block-out and 50% airflow
- Reinforced strip welded / folded edge banding for added strength
- Cable ties included
- Optional wind slits available for a small additional fee (please mention in your quote request)

Experience the reliability and convenience of our open weave fence fabric, suitable for a wide range of applications. It ensures optimal performance in challenging weather conditions, making it an ideal choice for your projects.
