

Portable Toilet

Product Images

Short Description

The Portable Toilet is a durable and reliable solution for sanitation needs, with a reinforced single skin roof, twin skin walls, and keyed lock for added security. It features an extra-large waste and freshwater tank, hygienic fresh water flush system, self-draining floor, and foot-operated pumps for flushing and hand washing. Its lifting lugs and galvanized steel skid make it easy to move.

Description

Introducing the Portable Toilet - the ideal solution for your sanitation needs. This modern designed toilet system boasts a range of features that set it apart from others in its class. With its twin skin walls and reinforced single skin roof, it offers a strong and durable construction that can withstand heavy usage. The toilet also includes a keyed access door, ensuring the security of the contents inside.

The extra-large waste tank and freshwater tank make it perfect for extended periods of use, minimizing the need for frequent maintenance. The hygienic fresh water flush system is operated by a reliable foot pump, ensuring efficient waste removal and a clean, fresh toilet every time.

The toilet is easy to clean with its self-draining floor, making it perfect for outdoor and indoor events. The toilet is also fitted with lifting lugs and a galvanized steel skid, making it easy to move from one location to another.

With its reliable, hygienic foot operated pumps for flushing and hand washing, the Portable Toilet is a great investment for anyone who values cleanliness, convenience, and comfort. So if you're in need of a strong, reliable, and efficient portable toilet, this is the perfect model for you.
