

Stainless Steel Concrete Fastener for Boundary Discs

Product Images

Short Description

Concrete Fastener for survey boundary discs. Sold in boxes of 100.

Description

Concrete fastener from Jaybro New Zealand.

Stainless steel nail enclosed in an alloy sheath most commonly used for attaching Boundary Discs to a concrete surface. Simply drill a hole, place the alloy sleeve into the hole and drive the nail in which expands the alloy sheath for a secure fix.

100 in a box.
