Short Description

Plastic Boundary Peg, 60 per carton

Description

Plastic boundary peg from Jaybro New Zealand. 60 pegs per carton.

Fieldwork plastic boundary pegs are manufactured by a global company that has put many years into the development of the product and as a result, surveyors throughout the world are shifting to this tough, light and easy to use product.

Partnering with this manufacturer gives us the ability to come in on the back of their extensive research and development spend. This R&D work features some exciting developments such as incorporating GPS - changing the boundary peg from a humble ground treated piece of wood into a product that can potentially make life in the field and office both easier and more accurate!

- 60 pegs per carton
- Head: Can be marked with text. Features an inserted metal part to offer metal detector finding ability.
- Shaft: Y shaped flute for easier driving and less resistance to sideways movement when positioning. Tough, robust, tried and proven plastic suitable for tough ground
