

# Galvanised Boundary Spike

## Product Images

## Short Description

---

200mm Long Galvanised Boundary Spike  
Sold in boxes of 30

## Description

---

A product Fieldwork Group developed when the new survey regulations came out which allowed surveyors greater flexibility in their choice of what they used to mark a boundary. The 200mm long spike with a section of angular grooving makes it a secure mark and the 28mm diameter head has the words 'Boundary Mark' engraved on the domed head clearly identifies what the mark is. A centrally located dimple on the head helps for accurate point location also - 30 spikes per box.
