
Star Posts Black Steel 2600 mm

Product Images

Short Description

2600 mm black steel star posts. Heavy duty design, yet still lightweight and easy to handle. These star posts are sold in increments of 10 only.

Description

Black steel star posts ideal for use on civil and construction work sites. Commonly used for erecting barrier mesh, flagging, bunting and many other applications.

These star pickets are a tradition Y shape fence post and are easily driven into the ground. Standard with pre-drilled holes allowing for barricade mesh to be quickly and easily fastened.

Jaybro also stock [star post drivers](#). These drivers make installing pickets fast, by using a hammering action. Drivers are of a heavy duty design with side mounted handles allowing for the user to hammer down the posts.

Other accessories Jaybro stock including Post removers and [star post caps](#). Star post caps are an essential part of site safety, covering sharp corners and reduced cuts and injury.
