

Red Fuel Container 10L Capacity

Product Images

Short Description

Fuel container in red polypropylene, with a 10L capacity. Supplied with flexible spout for easy dispensing.

Description

This heavy duty polypropylene plastic fuel container features a flexible black spout for easy dispensing of fuel, oils and other liquids. It comes complete with an anti-glug nozzle to ensure smooth easy and safe pouring. With a 10L capacity, this fuel container is perfect for keeping on hand in the work truck or onsite wherever a backup fuel or oil source is required. It is made in Australia from heavy duty poly and has a safe pour spout, ensuring the risk of splashes and spills is minimised. A Flammable Liquid 3 flammable / hazardous goods warning label is applied to the fuel can ensuring workers are aware of the contents and take necessary precautions around fuel stores.
