Description

Danger sign with the text - Formwork being stripped keep clear. Danger signage is a visual warning used when a situation can cause extreme harm or death. Used to alert employees and visitors of dangers that exists in location or in the work being carried out.

Displaying adequate safety signage will identify and warn workers of potential hazards in the workplace. Used to communicate important instructions and reinforce safety.

messages and provide instruction for emergency situations. Australian & New Zealand businesses have an obligation under Health & Safety legislation to use appropriate signage where applicable.

Ensure your meeting WH&S obligations by identifying hazards or hazardous situations with the relevant danger signage.

Danger signs are black and red and produced as either a vinyl sticker, metal, Coreflute or polypropylene signs in a variety of sizes.

AS 1319:1994 outlines specific requirements for the design and use of safety signs. Intended to regulate and control safety related behaviour in workplaces, warn of hazards and to provide emergency information to workers and the Public.
