Product Images

Short Description

Asbestos removal danger sign measuring 600 x 450mm, manufactured from 0.6 mm metal. Extremely durable signage, suitable for indoor and outdoor use.

Description

Danger sign - Asbestos Removal. Manufactured from 0.6 mm steel with a 7 year weather resistant coating, rounded corners and mounting holes. Asbestos danger signs provide visual warning. Identifying the presence of asbestos in the worksite.

Asbestos becomes a health risk once its fibres are released into the air and become breathable. Breathing in asbestos fibres can cause asbestosis, lung cancer and mesothelioma.

Due to the health implications relating to asbestos, it's vital that the appropriate signage be displayed. Alert employees and visitors of dangers that exists when Asbestos removal is in progress on a worksite, workplace or in the work being carried out.

Displaying adequate safety signage will identify and warn workers of potential hazards in the workplace. Danger signage is used to communicate important instructions and reinforce safety.

messages and provide instruction for emergency situations. Australian & New Zealand businesses have an obligation under Health & Safety legislation to use appropriate signage where applicable.

Ensure your meeting WH&S obligations by identifying hazards or hazardous situations with the relevant danger signage.

Danger signs are black and red and produced as either a vinyl sticker, metal, Coreflute or polypropylene signs in a variety of sizes.

AS 1319:1994 outlines specific requirements for the design and use of safety signs. Intended to regulate and control safety related behaviour in workplaces, warn of hazards and to provide emergency information to workers and the Public.
