Product Images

Short Description

High voltage overhead danger sign measuring 600 x 450mm, manufactured from 0.6 mm metal. Extremely durable signage, suitable for indoor and outdoor use.

Description

0.6mm steel with 7 year weather resistant coating. Standard with rounded corners and mounting holes.

Danger sign with the text - High Voltage Overhead. Promote a safer working environment by displaying adequate danger signage. This sign acts as a visual warning when a particular situation can cause extreme harm or result in death.

Manufactured from 0.6mm Steel with 7 year weather resistant coating, rounded corners and mounting holes. Designed to alert employees and visitors of dangers that exist in the location or in the work being carried out.

Displaying adequate safety signage will identify and warn workers of potential hazards in the workplace. Used to communicate important instructions and reinforce safety.

Messages and provide instruction for emergency situations. Australian & New Zealand businesses have an obligation under Health & Safety legislation to use appropriate signage where applicable.

Ensure you meet WH&S obligations by identifying hazards or hazardous situations with the relevant danger signage.

Danger signs are black and red and produced as either a vinyl sticker, metal, Coreflute or polypropylene signs in a variety of sizes.

AS 1319:1994 outlines specific requirements for the design and use of safety signs. Intended to regulate and control safety-related behaviour in workplaces, warn of hazards and to provide emergency information to workers and the public.
