

Traffic Separator - Yellow Centre Module - Flexible

Product Images

Short Description

Yellow flexible traffic separator, 1000mm(L) x 250mm(W) x 80mm(H). Traffic separators are a versatile and flexible delineation system - read more in this article detailing [our top 4 ways to use traffic separators](#).

Description

Flexible traffic separator centre module, for use with Jaybro's flexible traffic separator chevron panels and black & yellow end caps.

This yellow module forms part of the traffic separator system, perfect for separating lanes and preventing vehicles from entering into an area or changing lanes. It can also be used for tidal flow as a moveable median unit. Reflective posts or panels have a quick release system allowing easy removal/installation. With the addition of posts or panels and accompanying end caps, this centre module forms part of a highly effective traffic separator system.

Each horizontal centre module measures 1000mm long x 250mm wide x 80mm high, and easily slots into additional centre modules and its matching end caps (sold separately) using a tongue and groove join. The system can therefore be installed in any length, and can be semi-permanently fixed, or just loose laid for temporary situations. End caps provide a tidy finish to the traffic separator system whilst chevron panels or red bollard posts give extra visibility to motorists.

Features:

- 1000mm long x 250mm wide x 80mm high
- Requires 12mm bolts
- Can be laid loose or bolted (we suggest using 150mm x M12 or M14 screw bolts, or our [wheel stop fixing pins](#) combined with Megapoxy)
- Also available in black
- Use with end caps and chevron paddles

Additional Information

SKU	14-FTSC-Y
U.O.M	EA
Width	250 mm
Height	80 mm
Length	1000 mm
