

Cable Ties 300mm x 5mm, 500 Pack

Product Images

Short Description

Zip tie, 300mm x 5mm, 500 per bag.

Description

Black cable ties sold as a bag of 500. These cable ties measure 300mm long x 5mm wide. They have a multitude of uses around the job site and are also known as zip ties, hose ties and wire ties. These cheap and easy to use fasteners are an essential for any toolbox. They can be used to fix banner mesh to temporary fencing, hold cables and hose together, fix small items for transport, bundle small supplies, fix conduits in place, tie wire mesh together and all sorts of other applications.

These single use fasteners need to be cut to be removed and therefore they are a disposable item. It's convenient to have a bag on hand on the job site. Cable ties are simple to use and simply involve inserting the pointed end of the plastic tie into the slot in the head. The ratchet teeth slide one way and not the other, causing the tie to hold fast and lock when it is tightened. The excess end can be left as is or cut for a neat finish.

Features:

- 300mm long x 5mm wide
- 500 ties per bag
- Black
