**SUB-SOIL DRAINAGE**

**BEHIND RETAINING WALLS**

## Short Description

mastaTEX™ FiltaFabric FW grade 1m x 50m roll ideal for behind retaining walls, drainage, filtration, soil stockpile as temporary erosion control and subsoil filter.

## Description

mastaTEX™ FiltaFab is a high-quality staple fibre geotextile filter fabric, designed for landscaping and small civil works. Due to the 3 dimensional structure, it provides an effective drainage material both through the pores or within the fabric itself. mastaTEX™ FiltaFab is most commonly used as a filtration layer in trenches, as a pipe and aggregate wrap or behind retaining walls.

### Applications:

- Temporary erosion control
- Temporary drain silt protection
- Soil stockpiles
- Behind Retaining Walls
- Subsoil Filter
- Drainage
- Filtration

mastaTEX™ FiltaFab is not approved to be used on road or railways due to the mechanical properties of a short fiber material.
