

SILTmasta Sand Bag Filler

Product Images

Short Description

Utilising sandbags for flood control and construction work can be labour intensive. Filling hessian bags using

a shovel takes 2 people and in recent years sandbag hoppers have become an increasingly popular choice to reduce the time taken to fill bags. This hopper style sandbag filler makes it easy to fill sandbags, requiring just one person.

Description

Make light work of filling sand bags, requires only one person. This saves the worker from bending and lifting and potentially causing sprains and strains. In turn, using a sandbag filler can help your business reduce WHS claims. Can be used for both sand bags and SILTmasta™ Silt Bags.
