

Sorbex Floating Boom 125mm x 6m

Product Images

Short Description

Sorbex floating boom, measuring 125mm x 6m. Designed to absorb oil off the water, with rope and hooks to link them up to each section.

Description

Sorbex floating containment boom. An easy to deploy temporary floating barrier used to contain and absorb oil spills. An effective solution to reduce the spread of oil spills and helps make recovery easier.

This Sorbex booms can be placed around a spill to absorb oil on spills in water. It can absorb oil effective in large spills, manufactured with a hoop & rope design for connecting booms to increase the overall length.
