

4-Drum Poly Spill Pallet Bund

Product Images

Short Description

1240 x 1240 x 230 mm spill pallet with a 250L containment sump. 2700kg weight rating. This spill containment pallet easily contains and controls leaks and spills from drums or other items that you store on pallets within your working environment.

Description

Jaybro 4 drum spill pallet, manufactured from 100% polyethylene. Designed to catch overspill, leaks and spills from up to four drums or other items placed on the pallet.

The polyethylene pallet will not rust and resists corrosion and chemical damage. Fitted with a drain hole and plug for easy draining and cleaning, it also features forklift pick up points. This low profile unit offers ease of handling with a weight capacity of 2700kg and a 250 L sump.

Manufactured with filled ribs to prevent stacked or nested pallets from binding together, this design ensures your pallets can be stored neatly and effectively when not in use.

The pallet dimensions are 1240 x 1240 x 230 mm, with a mesh grate size of 1210 x 1210 x 25 mm. The pallet is designed to be forklift friendly with pickup points in the standard position.
