

Disposable Air Horn, Aerosol Can and Horn

Product Images

Short Description

Aerosol can & air horn designed for single use. This extremely loud air horn can signal up to 1500 metres.

Description

This compact safety gas horn can signal up to 1500 metres, enabling excellent long range emergency communication on site. It is a simple and effective way to signal your location and gain the attention of workers. Industrial applications include construction sites, rail work, fire signalling and other large sprawling work sites where a loud, immediately recognisable signal is required. The easy push button operation ensures anyone can use the horn in the event of an emergency on site. Replacement canisters are also available separately.

- Ozone-friendly propellant with no CFC emissions
- Signals up to 1500 metres
- Ideal for construction and fire evacuation emergencies
- 380ml capacity

- Short blast sounds for approximately 1 second duration
- Replacement canisters available separately
