The Jaybro Story

Jaybro Civil & Safety Products was started by Steve Joyce in early 1996. Steve had been in the construction industry for many years and he identified a need in the marketplace because he experienced:

- 1.** *Paying too much for site consumables,*
- 2.** *Being given large catalogues of items from suppliers, but many of them weren't in stock and the goods would be often delivered several days later;*
- 3.** *Waiting days for road & safety signs to be made,*
- 4.** *The ongoing frustrations of; calling the suppliers and they would only ask for a part number when he tried to describe the product he was looking for, or worse still, they weren't even open when he called at 7am.*

So Steve started Jaybro from his garage with the commitment to:

- 1.** *Providing same day delivery to sites.*
- 2.** *Keeping all products in stock in bulk so there were very few back orders – focussing of delivering the order in full the next day.*
- 3.** *Ensuring all customer service staff were well trained and had industry experience and knowledge. People that knew the products so they could correctly assist customers on the phone quickly.*
- 4.** *Open the office at 6:30am in the morning so the sites could get their orders in at the start of the day.*

Today Jaybro still lives by these values servicing civil and building contractors Australia & New Zealand wide.

OUR MISSION

To make life easier for construction contractors

HOW?

1

Buy direct & save

By making and importing 80% of our own products and selling direct to the trade, this cuts out the margin of a middle man and means lower prices for you. We are the only supplier who is prepared to publish our prices and to demonstrate how confident we are about our prices we guarantee to better any lower price by 5%!

2

Same day delivery in metro areas

Using our own fleet of dedicated drivers in the metro areas we can deliver direct to your site the same day. Order before 10am for delivery before 4pm or order before 4pm for delivery by 10am the next day.

3

No backorders

By 'selling what we stock and stocking what we sell, it enables us to keep a much greater depth of stock than our competitors, this means 99.8% of orders are delivered in full... the first time!

4

'Consider it done'

Our customer service team is different to our competitors, the team is made up of people who have come from the trade, they can quickly understand what you are looking for, they don't ask for part numbers and they are ready to take your call from 7am to 5pm, Monday - Friday.

5%

**PRICE BEAT
GUARANTEE**

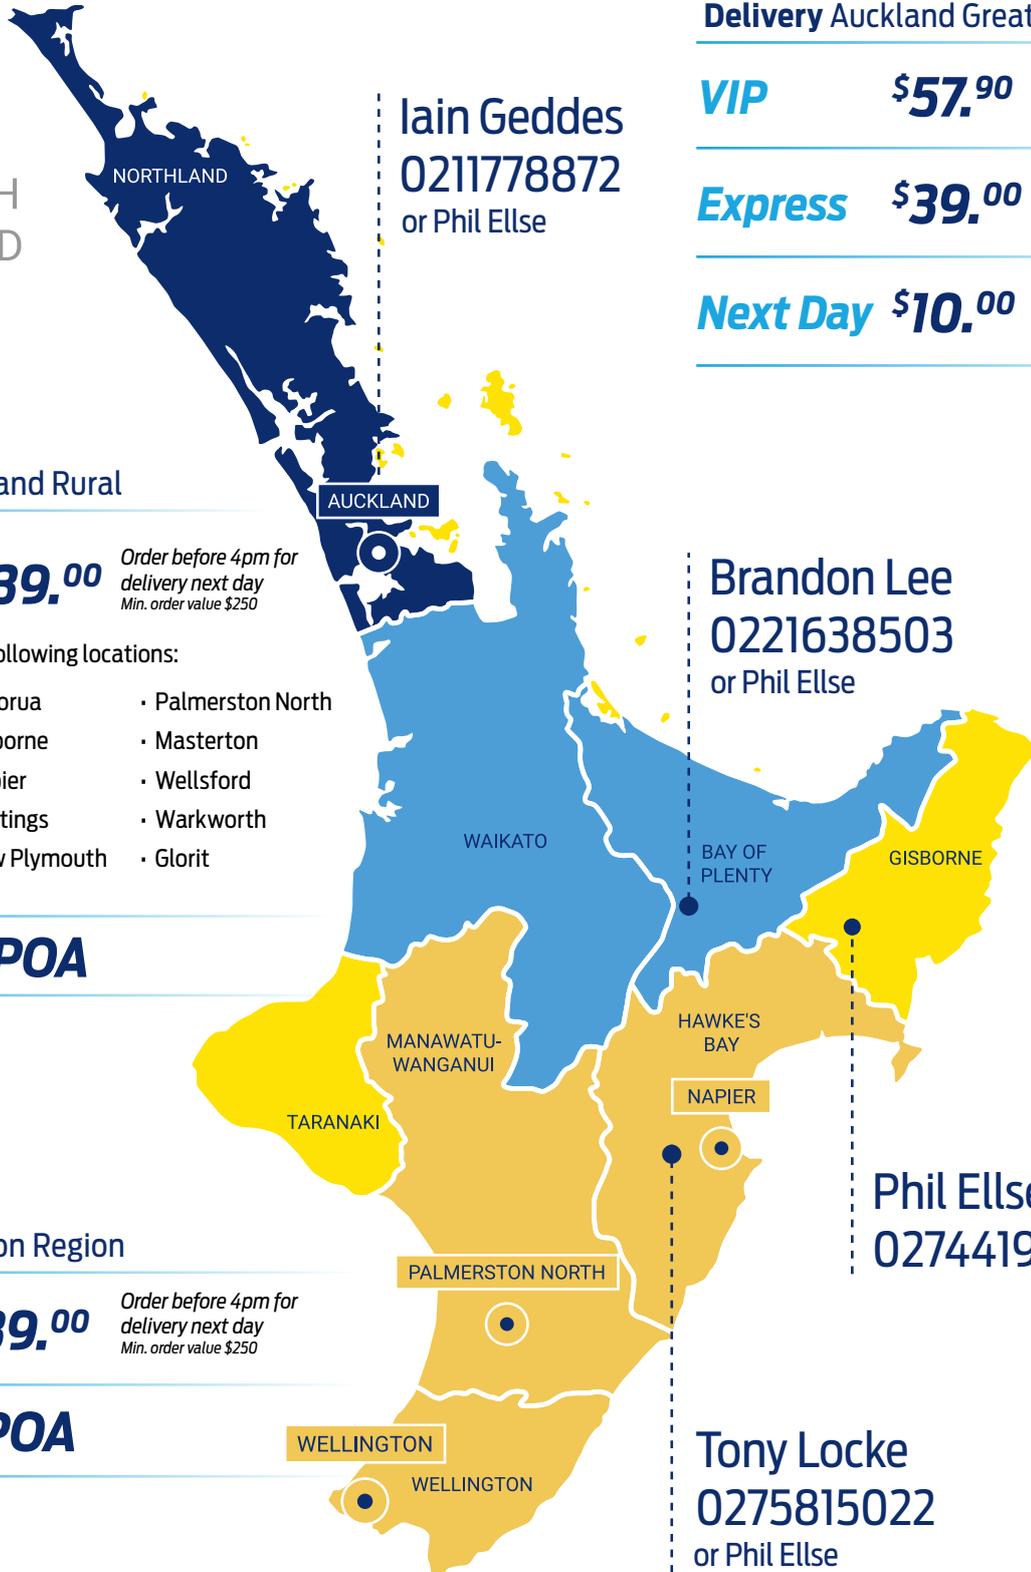

PRICE BEATING POLICY CONDITIONS:

- 1) Product(s) must be the equivalent specification.
- 2) A written quote that is valid must be provided.
- 3) Excludes Custom Signs, Printed Clothing & Sale items.
- 4) Excludes 'One off' offers or clearance items from competitors.
- 5) Excludes Freight costs & installations.

If you find a lower price for an equivalent to any product in our catalogue, Jaybro will better that price by 5%.

PEG CARRY BAG

Sturdy canvas bag with shoulder strap for carrying pegs and other field equipment around.

- Size: 700mm x 230mm
- Colour: Dark Green

PRICE PER UNIT		All prices +GST
CODE	DESCRIPTION	1 +
FW-2804		\$122.67

PEG BAR

The design has the head drilled right through with the shaft inserted into it and heat shrunk into the head. Once the shaft is heated on, we add some welding around the shaft base to give it extra strength, rather than just relying on a top weld which is what most other peg bars on the market offer.

PRICE PER UNIT		All prices +GST
CODE	DESCRIPTION	1 +
FW-1320	1200mm. Approx 9.5kg	\$105.06
FW-1322	650mm. Approx 4.5kg	\$69.63

14 SURVEY HARDWARE

DOUBLE SIDED BOUNDARY DISC

40mm in diameter, 1mm thick and an 8mm centrally locate hole to fit most fastening options.

- 100 per box

PRICE PER UNIT	All prices +GST		
CODE	500 +	100 - 499	1-99
FW-1565	\$2.68	\$2.81	\$2.95

STAINLESS STEEL NAIL

55mm long stainless steel nail most commonly used for fastening Boundary Discs to the likes of wooden posts etc.

Has a small centrally located dimple on the head for easy point location.

- 55mm long • 100 per box

PRICE PER UNIT	All prices +GST		
CODE	500 +	100 - 499	1-99
FW-1236	\$1.29	\$1.35	\$1.42

GALVANISED SURVEY SPIKE

A 150mm long spike with the markings 'Survey' and a small arrow in raised type on a domed head.

10mm diameter shaft gives good strength for driving.

- 150mm long • 25 per box

PRICE PER UNIT	All prices +GST		
CODE	200 +	25 - 199	1-24
FW-1247	\$4.07	\$4.27	\$4.49

CONCRETE NAIL

Small 25mm long concrete nail with washer for set out work.

- 25mm long • 100 per box

PRICE PER UNIT	All prices +GST		
CODE	500 +	100 - 499	1-99
FW-2018	\$0.52	\$0.54	\$0.57

GALVANISED TUBE

Boxed galvanised tube for surveying or for boxing pegs.

Comes in two options, 15mm ID and 20mm ID

- 15mm = 16/box • 20mm = 10/box

PRICE PER UNIT	All prices +GST		
CODE	SIZE	100 +	1 - 99
FW-1268	15mm x 500mm	\$6.44	\$6.76
FW-1269	20mm x 500mm	\$8.39	\$8.81

STEEL ROD

Boxed steel rod to make it easier in the field. Use for survey marks or for boxing pins.

- 100/box for the 12x250mm Rod
- 50/box for the 12x500mm Rod
- 28/box for the 16x500mm Rod

CONCRETE FASTENER

Stainless steel nail enclosed in an alloy sheath most commonly used for attaching Boundary Discs to a concrete surface. Simply drill a hole, place the alloy sleeve into the hole and drive the nail in which expands the alloy sheath for a secure fix.

- 100 per box

PRICE PER UNIT	All prices +GST		
CODE	500 +	100 - 499	1-99
FW-1237	\$1.05	\$1.10	\$1.16

GALVANISED BOUNDARY SPIKE

The 200mm long spike with a section of angular grooving makes it a secure mark and the 28mm diameter head has the words 'Boundary Mark' engraved on the domed head clearly identifies what the mark is. A centrally located dimple on the head helps for accurate point location also.

- 200mm long • 30 per box

PRICE PER UNIT	All prices +GST		
CODE	151 +	30 - 150	1-29
FW-1417	\$9.12	\$9.57	\$10.05

ROAD SPIKE

Manufactured with hardened metal to give greater strength for driving through seal. Sharp ballistic points for better penetration and a central dimple easily located by a bright red cross.

Used extensively for survey marks especially in curb and channel set-out. Also fits boundary and double sided discs as secure fastening options.

- 100 per box

SEISMIC MARKERS

Strong 700mm long impact resistant markers manufactured especially for seismic surveys.

Lightweight yet durable, seismic markers set the benchmark for usability and strength giving you the ability to hammer the markers into the ground yet still retain flexibility for areas where animals may be present.

- Strong, impact resistant material
- Lightweight - carry many markers in a bag
- Manufactured specifically for the rigors of seismic set-out

20 EROSION & SEDIMENT CONTROL

GEOMASTA™ DrainWarden

The Drain Warden is a sediment trap made from fabric that is positioned in a stormwater drain under the grate. The polypropylene nonwoven geotextile fabric is the filter medium, which traps any particulate greater than 90 microns.

Simply tie the straps of the Drain Warden to the underside of the grate, place it back into the drain recess and when the job is done, remove the Drain Warden which will now be full of sediment and runoff. The special filter fabric allows water to pass through whilst still trapping a large portion of debris, thereby preventing pollution of the stormwater system. An absorbent polypropylene mini boom positioned in the basin of the drain warden traps hydrocarbons, oils and fuels.

- Measures 1.3m x 1.3m x 600mm
- Traps particles >90 microns
- Helps you comply with environmental regulations
- Made from polypropylene nonwoven geotextile fabric
- Easy to install and remove

PRICE PER UNIT All prices +GST

**HESSIAN ROLLS**

Hessian Rolls are biodegradable and environmentally friendly, and can be used for a variety of purposes. These include protecting and screening plants, as part of a mulch system, and also in a variety of landscaping applications. Hessian is also used in the civil construction sector for increasing privacy on worksites.

- A tightly woven hessian fabric which is suitable for protecting root balls during tree transplanting, and as a short-term site screen
- Can also be used to maintain moisture in soils and turf, and for seeding
- Use as a short-term site screen to increase privacy and control dust and debris
- Folded for ease of application
- 50 metres x 1.8 metres
- 475gsm fabric weight

Applications:

- Landscaping
- Erosion control
- Moisture containment

26 GROUND PROTECTION MATS

GROUND PROTECTION MATS

- Creates an instant roadway over virtually any type of terrain - mud, sand, marshy, uneven or soft terrain.
- Protects valuable turf during landscaping projects.
- Superior alternative to plywood and fibreglass - will not warp, rot, crack or delaminate.
- Save time & labour getting vehicles and equipment traversed over difficult terrain.
- Avoid potential injuries to workers incurred while dislodging vehicles & equipment from mud.
- Protects vehicles & equipment from excessive wear and damage due to operating on unstable ground conditions.
- Easily handled and laid by two men - no need for expensive crane wagons.
- Simple to install
- Maintenance free & easy to clean
- Size: 2440 x 1100 x 12.5mm
- Weight: 48kg
- Colour: Black
- Lay as two parallel tracks or a single roadway, linked together with metal connections. Easily cleaned due to less aggressive lug pattern.
- Extremely durable to withstand vehicle weights up to 80 tonnes.
- Tested in extremes of hot and cold climates/ Can be used hundreds of times - Guaranteed for 7 years.
- Manufactured using super-strong high density polyethylene plastic (HDPE) and are chemical, weather and UV resistant.
- Each mat has a unique integrated tread pattern moulded onto both sides providing traction and stability for nearly any type of heavy equipment.

PRICE PER UNIT		All prices +GST	
CODE	10 +	1 - 9	
49-PROMAT80	\$220	\$231	

*As with all temporary roadway systems, our mats are not suitable for use with steel tracked excavators and their use will result in damage to mats.

*Area should be relatively level, large rocks or obstacles must be moved before placing the mats;

*This mat is not bridge material, it should never be used to cross or span large gaps

*We suggest in-door storage, if stored outdoor, protection cover should be used in order to avoid strong sunshine / UV rays which will be harmful to the plastic.

Green

BIO**BIODEGRADABLE**

Means being able to be broken down by natural processes, into more basic components in a set time frames. Products are usually broken down by bacteria, fungi or other simple organisms without affecting the environment. Most of the products from CLEAN PLUS Chemicals contain readily biodegradeable ingredients.

NP**NON PHOSPHATE**

Phosphate from detergents eventually ends up in creeks, wetlands and rivers via waterways leading to ALGAE BLOOMS. This reduces the amount of oxygen and created problems for aquatic life. CLEAN PLUS Chemicals strives to avoid Phosphate usage wherever possible

P**LOW PHOSPHATE**

Phosphate are builders which decrease the hardness of water allowing the detergent to wash clothes, dishes and cars better and keeps dirt in suspension with water. However, this property of Phosphates makes them more effective in cleaning industry.

The usage of phosphates in some CLEAN PLUS chemicals products complies with the agreed phosphorus standard of less than 7.8 grams per wash

SS**SEPTIC SAFE**

Septic systems are a type of On-Site Sewage facility. The term "septic" refers to the anaerobic bacterial environment that develops in the tank and that decomposes or mineralizes the waste discharged into the tank. Most of CLEAN PLUS Chemicals products are SEPTIC SAFE when used in accordance to the dilution rates provided which does not interfere in bacterial activities.

COIR MESH

EROMasta™ CoirMesh is an open weave organic fibre mat made from 100% coconut fibre. Coir Mesh has a longer effective life than other biodegradable erosion control materials and can last up to 3 years. Coir products hold water efficiently, ensuring a moist environment to promote faster plant growth.

EROMasta™ CoirMesh has a higher tensile strength than the more common JuteMesh products, allowing it to be installed on steeper batters, or areas with a higher water flow.

COIR LOGS

COIRmasta™ CoirLogs are an environmentally friendly alternative to hay bales and expensive rip-raps or cement stabilisation techniques. COIRmasta™ CoirLogs are ideal for constructing check structures, managing changes in stream flow velocity, shaping channels and stabilising shorelines.

A natural planting medium for vegetation and made from 100% coir (coconut) fibre compacted into an outer mesh of bristle coir twine, COIRmasta™ CoirLogs are a totally biodegradable material that last up to three to five years and are biodegradable within 5-10 years. They are easily installed and will blend naturally into the environment over time.

ROOT BARRIER HDPE

GEOmasta® Root Barrier is designed to prevent the intrusion of tree root systems into sensitive areas. Tree Roots can aggressively spread and cause costly damage to buildings, pipes, foot paths and roadways, becoming both dangerous and expensive to repair. Made of virgin HDPE (High Density Polyethylene), GEOmasta Root Barrier offers superior performance and is more cost effective than traditional methods such as CFC Sheeting or Sheet Metal.

Care should be taken to install Root Barrier from surface level to 25% below the nominal root depth of the tree species being planted to ensure the roots do not grow under or around the barrier.

Smooth sided Root Barrier is generally the preferred option for root deflection due to the limited hold offered for young roots.

MASTATEX™ NONWOVEN

mastaTEX™ Nonwoven is a continuous filament geotextile made from highly durable virgin polyester fibres, which are resistant to all naturally occurring soil acids and alkalis.

The textile is formed through needle punching in order to produce a product suitable for use in road & rail work, separation, drainage, protection and filtration works.

mastaTEX™ NonWoven geotextiles are manufactured to ISO 9001 quality assurance procedures. Properties of mastaTEX™ NonWoven geotextiles are averages derived from in house and independent laboratory testing overtime.

MASTATEX™ FILTAFAB

mastaTEX™ FiltaFab is a high quality staple fibre geotextile, designed for landscaping and small civil works. Due to the 3 dimensional structure, it provides an effective drainage material both through the pores, or within the fabric itself. mastaTEX™ FiltaFab is most commonly used as a filtration layer in trenches, as a pipe and aggregate wrap or behind retaining walls. mastaTEX™ FiltaFab is not approved to be used on road or railways due to the mechanical properties of a short fibre material.

GEOMASTA™ RETAINING PINS

GEOMasta retaining pins, used to fix geotextile fabric or erosion control matting to the soil ground. Chisel tipped ends allow the pin to pierce through geo fabrics for a quick and easy installation.

150mm geo pins are used in most cases for relatively firm compacted soils, with the longer 300mm pins used for pinning through loose topsoil.

MASTAGRID™ POLY

mastaGRID™ Poly is an engineered polypropylene geogrid designed for soil stabilisation, separation & reinforcement applications. This is done through the process of extruding, polypropylene sheets then both stretching in both longitudinal and transverse directions.

mastaGRID™ Poly rigid biaxial geogrids perform best in granular, angular fills and are used under roads, railways, loading platforms for sub-base soil reinforcement & stabilisation.

PRICE PER UNIT

MASTAGRID™ COMPOSITE

mastaGRID™ Composite is an engineered geogrid designed for soil stabilisation, separation and reinforcement applications. mastaGRID™ Composite is manufactured from Polypropylene through the process of extruding, longitudinal and transverse heat stretching. mastaTEX™ is then heat bonded to the grid to form a sound composite structure.

It is designed to prevent reflection cracking, water damage and improve load capacity in road construction and renovation. It has the property of high temperature resistance and anti-fatigue cracking and therefore extending the life and time of asphalt pavements.

MASTATEX™ CONCRETE

mastaTEX™ Concrete is a needle punched composite, consisting of concrete-sand mix, embedded and fixed between two layers of geo-textile. It is much faster and cheaper to install than conventional materials, and our strict quality control of raw materials makes the finished product fail-proof.

It provides a substrate for direct applications of a thin protective layer of regular concrete, which may be used in various weather conditions. The fabric is fastened to an outer part with nails, which provides a solid water-resistant surface stabilisation, further braced thanks to internal reinforcing fibres.

Applications

- Embankments
- Replacing Shotcrete
- Bund Lining
- Slope Stabilization
- Mattress Spillways
- Trenches/Swale Drains

The very best quality banners at unbeatable prices!

Jaybro provides a comprehensive range of Premium Mesh, Open Weave Mesh to provide site privacy and advertising for buildings, construction sites or events.

We offer a number of extra-large printing options delivering truly outstanding results in both scale and quality. No matter how big or colourful your design we can find the solution that's right for you.

And if you need help with producing a creative design – well, we can help you with that too!

1 SELECT THE MATERIAL THAT'S RIGHT FOR YOUR PROJECT

We have 2 types of material to choose from, each has different print and durability characteristics. We recommend Open Weave Mesh if your site is wind exposed. Where you need superior privacy, print quality and durability we recommend you get Premium Mesh.

MATERIAL	CODE	STANDARD PRINT ROLL SIZES*	FABRIC %*	DURABILITY+	PRINT QUALITY
Premium Mesh	48-PFFP	50 x 1.6m	80%	3 Years	Very High
	48-PFF18P	50 x 1.8m	80%	3 Years	Very High
Open Weave Mesh	48-PFFOW16	50 x 1.6m	(175gsm) 50%	1 Year	High
	48-PFFOW18	50 x 1.8m	(175gsm) 50%	1 Year	High

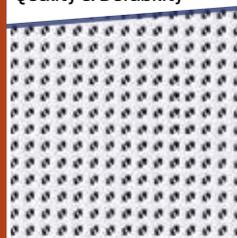

^ Full Ink Coverage is required to print to the full area of a Roll. Where this is not required, specify Block Printing to cover up to 70% of the fabric area.

* Mesh Fabric % indicates the overall percentage of printable material, the lower the percentage the more aerated the fabric.

+ Durability indicates expected life span of the banner material and print under average weather conditions but does not cover damage caused by high winds, extreme weather events or inappropriate installation.

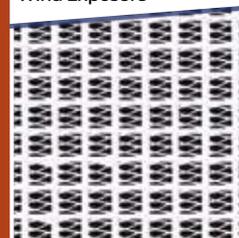

PREMIUM MESH

2 SUPPLYING ARTWORK SPECIFICATIONS & GUIDELINES

Whether you plan to supply us with logos and images to produce a design for you, or provide ready to print artwork, please ensure you follow our artwork guidelines to ensure we can get the best print results for your project.

SUPPLYING MATERIAL FOR US TO CREATE ARTWORK

1. Supply logos as vector files – pdf or .eps formats.
2. All images supplied as high resolution jpeg files at 10% of actual print size at 300dpi.
3. All text via email or in a Word doc file.

SUPPLYING PRINT READY ARTWORK

1. Create artwork using Illustrator or CorelDraw.
2. Set artwork dimensions to 1/10 scale (10m = 1m).
3. Maximum sizes:

All Mesh/Fabric Materials

- Trim: 50m x 2.4m (artwork: 50,000 x 2400mm)
- Print area: 50m x 2.36m (artwork: 50,000 x 2360mm)

4. No bleed or crop marks should be set.
5. All colours to be set to CMYK. (RGB or Spot colours are not accepted)
6. All images should be embedded into artwork as cmyk tif files at a minimum of 300dpi and a maximum of 450dpi. Where possible crop the images to the desired size, avoid scaling of images in the artwork program.
7. All text should be converted to paths/outlines or fonts provided with artwork.
8. All vector logos should be pasted into the artwork (image based logo files are not accepted).
9. Avoid using complex or multiple 'effects' on text or graphics. If effects are used, 'flatten layers' before saving pdf.
10. All artwork should be saved and supplied as an editable pdf at a minimum of 300dpi if images are included, ensure all text is converted to outlines.

Please note: Any provided files not set up to the required specification will be returned with amendments and comments.

1. While every attempt is made to produce your artwork to match the required colours and images as supplied, there may be some variations depending on the material you choose to print on and the scale to which you print.
2. Where a specific corporate colour is required to match precisely, a print sample can be created on request to approve prior to final printing at an additional cost. Please note that we use a CMYK printing process and matching PMS colours precisely is not possible.
3. The sharpness of images is reliant on the quality of the images you supply. We take no responsibility for the results for the quality of reproduction when images are not supplied to our required specifications.

3 PROOF & PRINT QUALITY CONTROL

Once your artwork has been received we can either print it directly or provide you with a proof for your approval.

CUSTOM PRINTED FENCE FABRIC MULTI-SIGNS

Sick of multiple signs on your fence? Sick of losing vital safety signs at your site entrance? Call today and let us design and print all your site entrance signs on one banner! **0800 865 292**

(CODE 01) METAL

0.6mm steel with 7 year weather resistant coating. Standard with rounded corners and mounting holes.

(CODE 02) POLY

1.6mm flexible weather resistant polypropylene. Highly recommended for outdoor use. UV stable and resists fading and cracking for up to 5 years. Poly is fully recyclable and made from 70% recycled material. Standard with rounded corners and mounting holes.

(CODE 03) CORFLUTE

3mm fluted plastic. Low cost alternative, ideal for temporary applications.

(CODE 04) SELF ADHESIVE VINYL

Outdoor heavy duty permanent adhesive vinyl. Simply peel backing paper off and apply to any clean smooth surface.

SIGN DIMENSIONS

CODE	SIGN SIZE	SIGN MATERIAL
A	600 X 450	POLY

D	450 X 200	METAL

WHY POLY SIGNS ARE VALUE FOR MONEY!

- Lasts longer than flute & metal (will outlast flute up to 7 times).
- Five year outdoor guarantee.
- Flexible - won't dent or crease.
- Cheaper than metal.
- Can't be pulled off fences like flute.
- Comes with rounded corners and mounting holes.
- Easy to handle and put up no sharp corners.

FLEXIBLE TRAFFIC SEPARATOR

This system can be used to separate lanes or areas, preventing vehicles from entering into an area or changing lanes. Reflective posts or panels have a quick release system allowing easy removal/installation. Can be permanently fixed, or loose laid for temporary situations.

Centre module: 1000(L) x 250(W) x 80(H)mm
 Post: 900mm(H) 1 post required per module
 Panel: 750mm(H) 1 panel required per module
 End Cap: 500(L) x 250(W) x 80(H)mm

Centre Modules

- Size: 1000mm long x 250mm wide x 80mm high
- Requires 12mm bolts
- Can be laid loose or bolted (we suggest using 150mm x M12 or M14 screw bolts, or our wheel stop fixing pins combined with Megapoxy)
- Use with end caps and chevron paddles

PRICE PER UNIT		All prices +GST		
CODE	COLOUR	50 +	25 - 49	1 - 24

70 TEMPORARY WARNING SIGNS

All signs are manufactured in accordance with specification in the manual of the Traffic Signs & Markings Part 1, Section 5.

TEMPORARY WARNING SIGN STANDS & BASES

LEVEL 1 - STAND & BASE

35mm double sided stand that can be used with a drivable stake or folding base. The upright frame easily drops into the folding base allowing it to be highly versatile and be assembled smoothly and quickly.

Warning signs slide onto the stand and fit securely with the sign locking system. The folding base has 4 legs that can be easily setup and folded down for it to be removed and stored easily.

- Manufactured with high grade galvanised steel
- Versatile and lightweight for fast assembly
- Double sided stand holds 2 warning signs simultaneously
- Locking system ensures signs are firmly secured in place
- Folding base is light and compact for storage
- Size: 35mm

Folding Base - Open

FORTRESS ACOUSTIC CURTAIN SOUND BARRIER

We have proven through various trials, tests & re-designs that our soundproof fencing is incredibly durable. We have combined the most durable material properties to provide a weatherproof and UV resistant acoustic panel that will withstand the toughest conditions with minimal deterioration.

A cost-effective solution for mitigating airborne noise, the Fortress Sound Barrier acoustic curtains are lightweight, easy to install, and provide noise reduction of up to 40dB!

Each panel measures 1.3m x 2m and is constructed from a layered noise dampening materials, resulting in a tough, durable acoustic barrier that is extremely effective at attenuating noise. With Velcro strips on each long side and a neat hemmed and eyeletted finish top and bottom, the panels form a solid barrier when clipped together.

Fortress Sound Barrier curtains are easy to fit to temporary fencing, hoarding, scaffolding and other construction walling. They are UV and weather resistant giving them a long life span, and can be custom printed with your brand, turning them into an effective advertising medium.

FEATURES

- Size: 1.3m x 2m (3m high panels also available)
- Weight: 8kg per panel
- Up to 40 db reduction
- Fully transportable
- Quick and easy to erect
- Weather and UV resistant
- Robust and durable
- Versatile – can be installed indoors and outdoors
- Also effective in controlling dust & fumes
- Available to suit a full range of noise frequencies
- Vision panels & access doors can be added

82 XT EDGE PROTECTION BARRIER SYSTEM

XT EDGE PROTECTION BARRIER SYSTEM

STANDARD XT BARRIER PANEL

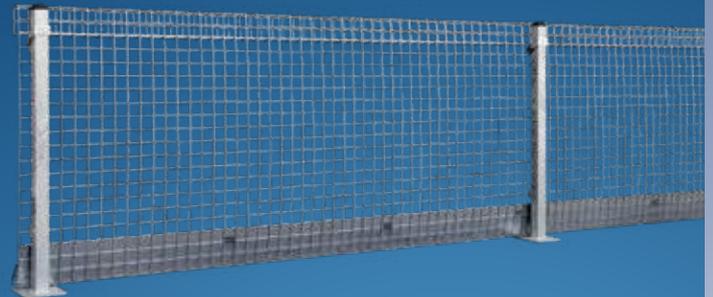

The FORTRESS XT Barrier System™ is designed to create a protective barrier around hazards, voids, drop-offs, edges and other no-go areas, ideal for industries such as construction, excavation and crowd control. The Fortress XT Barrier System™ is easy and fast to install using galvanised steel post bolted to the ground.

This galvanised welded mesh panel is manufactured from 4mm steel wire at centres not exceeding 50mm x 50mm. Each panel features a rectangular rolled top and triangular bottom incorporating a galvanised kickplate that helps prevent objects falling through the panel bottom.

Size: (H) 1000mm x (W) 2400mm

PRICE PER UNIT All prices +GST

CODE	100 +	80 - 99	1 - 79
07-EPP240	\$82.97	\$87.11	\$91.47

XT BARRIER SYSTEM POSTS

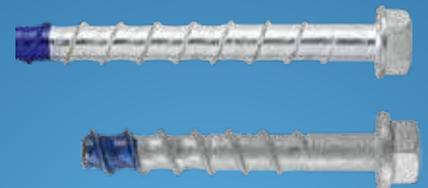

Galvanised, 50mm RHS square, 1005mm high posts incorporate top and bottom wire panel holding lugs with slide and lock assemblies, making panel installation and removal quick and simple.

Fortress XT barriers can be fixed to concrete. The low profile, 152mm square x 5mm fixing flange has 4x13mm diameter holes for use with 4x10x75 or 10x80mm) masonry bolts or similar, however engineering advice must be sought for requirements of concrete specifications.

Ideal for: Fixing to concrete paved areas

ANTI-GAWK SCREENS

Mesh panels commonly known as anti-gawking screens are used on civil work sites and construction sites to reduce the visibility of the sites activities to the general public and to pedestrians or vehicles passing by.

Reducing visibility on roadside work zones provides safety for road users. Drivers often become distracted by roadwork and this can lead to hazardous situation for both drivers and workers.

Anti-gawk screens can also play an important role in promoting your business, brand or project, with the use of printed banner mesh or shade cloth which is easily attached to the mesh panels.

SPECIFICATIONS

- Suits Anti-gawk and Anti-debris applications
- Can be used with both Star Posts and Dynabolted posts
- Custom printed panels also available
- Shadecloth and Banner Mesh easily attachable
- Size: 3000mm (L) x 1000mm (H)
- Mesh: 257mm x 61.25mm, 4mmØ
- Finish: Galvanised

94 WATERFILLED BARRIERS

RICOCHET SAFETY BARRIER

The first ever barrier system to achieve the MASH-1 Certification Standards in New Zealand.

The Ricochet Safety Barrier is designed to have the greatest energy absorbing capability. This provides a greater degree of safety and a lower risk of injury with any vehicle impact.

Each barrier has a drain point on each side allowing water to be drained safely without entering live traffic lanes and the fill point is designed so water can be sucked out if required. Each barrier also has two 22mm mounting holes in the top that allow screens to be installed, removing the distraction of work zone activity for drivers.

102 EYE PROTECTION

SAFETY GLASSES - Extreme

Jaybro's range of Extreme Safety Glasses provide superior user comfort. With a sense of style, the Extreme medium impact eyewear helps reduce eye injuries and mishaps whilst on the job.

Offering protection against dust, debris and flying materials, the Extreme features a stylish one-piece design which includes a soft rubber nose piece. These ergonomic safety glasses are very comfortable making them ideal for all day wear.

The wrap around lens ensures greater protection and soft temple arms reduce pressure behind the ears. Approved to Australian Standards AS/NZS1337 for Medium Impact safety glasses. The Extreme safety specs provide lightweight and economical protection.

- Lightweight wraparound style
- Approved to AS1337:2010
- Low profile arms for comfort when wearing head protection
- Suitable for a wide range of industries such as civil, building, construction, production and manufacturing, landscaping and drainage, mechanical and assembly and much more
- Colours: Smoke, Clear, Copper

104 GRIPLITE GLOVES

Griplite™

GLOVE STANDARDS - EN 388:2016

According to this standard, characteristics such as abrasion resistance, cut resistance, tearing strength, puncture resistance and impact protection are tested. In conjunction with the pictogram, four numbers and one, or two letters, will be displayed. These signs indicate the performance of the glove. It's important to understand is: it's not the gloves performances that has changed. It is the way of testing the performances that has changed.

EN388:2016

1234BP

- 1234BP
- 1. ABRASION RESISTANCE (0 TO 4)
 - 2. CUT RESISTANCE, COUP TEST (0 TO 5) X= N/A OR NOT TESTED

INDI - DUCTILE IRON INFILL COVER AND FRAME

Commonly used for junction pits and onsite detention tanks the range of infill covers are designed to allow access for maintenance. The frame is designed to be cast into concrete slab in the tank or above the pit and the cover is filled with concrete making the pit or tank sealed for gas, air and water. Manufactured and tested to meet AS3996.2006 this range of covers are available Class D and Class B.

PRICE PER UNIT		All prices +GST
